New European Employment Barometer Tracks Labour Market Data SIA, WEC

New European Employment Barometer Tracks Labour Market Data

Munich, Italy, California & Brussels, Belgium – March 20, 2019 – Staffing Industry Analysts (SIA), the global advisor on staffing and workforce solutions, and the World Employment Confederation (WEC), the trade association for the private employment industry at a global level, have announced the launch of the European Employment Barometer, an interactive new research tool that covers key labour market indicators across 20 countries.

The Barometer, which is a joint initiative between SIA and the World Employment Confederation, is designed to enable users to filter, sort and download selected graphs, statistics and pertinent insights related to the employment situation and agency work in Europe.

With real-time data compiled from Eurostat's most recent labour market survey, along with findings provided by European staffing associations, the tool can be used to track data and market trends over time and for specific geographies. The Barometer issues each quarter and captures latest Eurostat releases, along with historic data from 12 2010 to present.

"We're delighted to create this unique data set with our partners at the WEC," said John Huthwaite, Executive Director of Global Research at SIA. "It is an invaluable tool for those interested in keeping up-to-date with labour trends across Europe, especially those relating to temporary work."

The provided metrics can also be used to correlate indicators with economic factors to illustrate relationships between economic trends and temporary agency work, and to compare across sections of specific data.

"This new tool builds on the joint expertise of SIA and of WEC's national federations members on labour markets. It helps to derive an understanding of present and relevant activity in the European staffing, recruitment and workforce solutions industry and demonstrates how the staffing industry's development is closely correlated to the economic situation," said Denis Prevost, Managing Director of the World Employment Confederation.

The European Employment Barometer is available as part of SIA's research, as well as via the [SIA website](#) and the [SIA mobile app](#).

About Staffing Industry Analysts (SIA)
SIA is the Global Advisor on Staffing and Workforce Solutions
Overseeing the Workforce Solutions Enterprise
Founded in 1995, SIA is the global advisor on staffing and workforce solutions. Our proprietary research covers all categories of employed and non-employed work including temporary staffing, independent contracting and other types of contingent labor. SIA's independent and objective analysis provides
